Bafna Devices Pvt. Ltd.

<http://www.bafnadevices.in/>

Our organization is a popular name in the market involved in supplying, trading and importing a wide spectrum of Electronic Components. Offered products are appreciated across the market for their optimum performance.

About Us

Known for the supplying, trading and importing quality assured collection of Electronic Components, we "**Bafna Devices Pvt. Ltd.**" started our business operation in the year of **2010**. Under our quality proven product range we are offering integrated circuit, load cell and light emitting diode. These products are manufactured at our vendors end by using only high grade components in full accordance with the industry accepted standards. Our vendor's employees use upgraded tools and technology to fabricate the offered products. All these provided products are well recognized across the market for their unmatched quality, excellent finish and precise dimensions.

To satisfy our clients in best possible way, we are offering these products in various specifications as per the client's demands and needs. For this purpose, we have developed a vast vendor base in the market. Our vendors are manufacturing these products by keeping in mind the industry quality norms. We are fully supported by our team of professionals. Apart from this, we are offering these products at best price in the market to our valued clients.

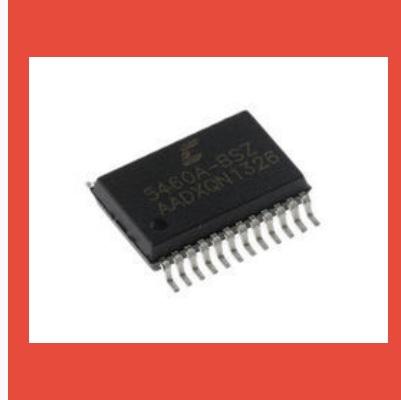

With the constant motivation and guidance of our mentor **Mr. Rajendra Bafna**, we have established this remarkable position in the market. Owing to his fair dealing policy and ability to handle the diverse conditions, we are able to offer optimum level of customer satisfaction.

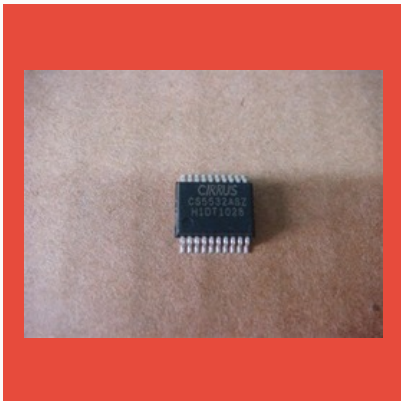

INTEGRATED CIRCUITS
